Fought to Retain Formula Which Has Made a Fortune

L. T. Cooper, the man who believes Bill Soon to Be Introduced Is that 90 per cent, of all ill health of this generation is caused by stomach trouble, is fast winning a national faith in his theory. His claim is now admitted by a surprising number of people throughout the country, and he is gaining new adherents every day.

While speaking of his success in a recent interview, Mr. Cooper said: "I believed ten years ago that any one who could produce a formula that would thoroughly regulate the stomach would have a fortune. When I got hold of this formula I knew within six months that I was right, and that my fortune was made. I called the med Icine Cooper's New Discovery, although I did not get up the formula. I have owned it, however, for over I have had one lawsuit five years. over it, which I won in the courts. When it was settled The Cooper Medicine Company became the only firm in the world that can prepare the medicine. The preparation has sold like wildfire wherever introduced. As I have said before, it is successful simply because it puts the stomach in perfect shape, then nature does the rest. There are any number of complaints never before associated with stomach trouble that the medicine has alleviated in thousands of

Among statements obtained recently from users of this medicine that is arousing such universal discussion is one from Mrs. Emma Stanley, living in Chicago, at 713 Washington Boule-vard, who said: "Perhaps I had the most complicated case that Mr. Cooper had to deal with. I was troubled for years with my stomach. I consulted with doctors and took many patent medicine preparations without result. My stomach was in such a wretched shape that I could not enjoy a meal that I ate.

'I was very nervous, and could hardly sleep. I had a roaring in my ears and dancing spots before my eyes. I felt very bad and weak. Then there was a very sore spot at the pit of my stomach that nearly set me wild.

I heard about the Cooper medicina and decided to try it. I used four betties, and the improvement in my case has been really wonderful. My nerves have been quieted, and I am so much improved that I feel like a new

"I cannot say too much for these wanderful remedies, for they have made me well."

Unexpected Recommendation. One day, when Lord Thurlow was very busy at his house in Ormond street, a poor curate applied to him for a living, then vacant

"Don't trouble me," said the chanturning upon him with a frowning brow "Don't you see I am busy and can't listen to you?-what duke or ford recommended you?"

The poor curate lifted up his eyes and, with dejection, said he had no ford to recommend him but the Lord of Hosts

The Lord of Hosts!" replied the chanceller, "the Lord of Hosts! -- I believe I have had recommendations from most lords, but do not recollect one from him before; so do you hear, young man, you shall have the living"

teaning of Cemetery

It is not correct to say that "cemetery" means the "city of the dead." The word is from the Greek "Koimeterion," meaning sleeping place, not the place of the dead. There is nothing in the thinking that it was originally intended to convey the idea that the departed were really dead any more than there is in the old Hebrew term a for cemetery-"Bethaim"-the house of the living

HEALTH BUREAU STRONGLY URGED

Backed by Associations and Physicians.

WOULD SAVE NATION BIG SUM

President Taft and Senator Aldright Busy with Financial Legislation Plans-Administration Favors Central Bank Scheme.

Washington -- Congress is to be asked before long to pass a bill creating what shall be called a National tureau of Public Health. It is urged hat great associations and thousands of individual physicians are anxious the government shall take cognizance of the necessity for a more adequate system of guarding the health of the American people. Time and again uggestion has been made that there should be a department of health with a chief who would have a place in the president's cabinet. It is not likely that congress for years to come, at any rate, will sanction the creation of such a department of government, but it is likely that a health bureau of ome kind before long will be estab

It must not be taken for granted that Uncle Sam does not do anything to look after the health of his nephews and pieces. The Marine bosnital very ice is efficient, and it is aided in its work by the medical corps of the army and navy. The American Bealth cague is petitioning congress to esablish a National Inreas of health, and it is asking the people to back up

Plea of Health Officers.

In a communication recently put out from its New York headquarters, offiints of the bureau of health, say:

Responding to general demands for ch a scientific check to the prevent able diseases and deaths that are now known to cost the nation \$1.500,000 000 in life and labor each year, offi- or influence by means of the legislacers of this organization are making tion when it is finally enserted. made of their recommendation, which was contained in the platform of the three lending parties in the last pres idential engunies and which has been advocated by leaders of every political faith since that time. President Taft has toot assured representatives of the American Medical association and American Health league, they declare. that he is heartly in favor of this If the people of every section of the land will declare themselves on this vital question in the next lew weeks, it is asserted Uncle Sam soon may be persuaded to give the same at tention to the physical welfare of hu man beings that he now does to that

of sheep cattle, hens and hogs." The friends of the plan for a health bureau under government control say that the bureau is particularly neces eary to warn the people of this counof the dangers that menace their vitality in the most common walks of veryday life." Then the American Health league says that it is calling attention to drugs as well as diseases. Declaration is made that numerous forms of drug habits are becoming more prevalent everywhere in the United States than people realize. The dangers of cocaine, morphine and opium are pointed out, and it is said that vigorous efforts which are being made control and minimize their sale ught to have the sanction, the backing and the aid of a government burenu.

While physicians are trying to get government recognition of the need of federal safeguards for the health of the nation, sociologists are trying to get Uncle Sam to establish what bill which appropriated a sum intention of the lawmakers, if they pass a bill of this kind, to make the to not as a sort of a drill master ! deep study of the causes of crime with a view of finding out if it is not the preventive measures which are so ling troops to this country to help the much better than cure measures.

Crime | Disease.

Some people go so far as to say that orime in many of its forms is a disease. A great many people admit that crime is frequently committed by persons who are the victims of circumstances and who are not impelled to crime by what may be called real criminal motives. If congress shall establish a bureau of criminology, the experts will study living conditions of the people, the effect of poverty and liquor drinking on crime, and many other subjects which may shed light upon the main question. The same argument that is used by physicians for the establishment of such a bureau as they want is used by the friends of the other project. They say that if Uncle Sam is willing to spend millions every year through the agricultural place before an attempt was made to department to check the ravages of indestroy it. At least it was supposed sect pests, that he ought to be willing to spend a few thousands to check the ravages of crime. In recent years by some unknown person near the congress has paid more attention to base of the statue. The bomb did no what may be called sociological matters than it ever did before. The study of sociological subjects has

spread all through the land, and con grous has felt the effect. Preparing Financial Measure.

Now that President Tait has sent congress all of his important recomendations that he has a hope will enacted into law this winter, he is erning his attention to the question financial legislation which must oc upy the time and minds of the ma onal legislators. Senator Aldrich, the is the chairman of the national conetary commission, is in constant onference with the president over be form which the great financial consure is to take. The president believes that Senator Aldrich, in this natter of reform of the currency. absolutely sincere and that the Rhode slander hopes to make constructive nancial legislation something like a nonument to his legislative memory

It can be said that the chances are 9 In 100 that it is the intention of he administration, on the advice of the majority of the monetary comulation, to recommend to congress next year some plan for a central bank of home. In all the speeches which Senator Aldrich made in the west and in all the Interviews to which he has submitted since congress ascembled, he has made no direct statement that he is in favor of a central bank, but it is known that his aind and attention rest upon such an institution as one of the best means. as he views it, to make stable the country's financial system

Details Not Worked Out.

The president has had presented to him a number of different plans for a central bank, but to none of them has he given a final preference, and it can be said without fear of contradic tion that Mr. Aldrich himself has not stated definitely just which plan be thinks should be selected for nitimate approval. Mr. Tall wants a central bank, if the country is to have any which in a memoire will be a mean between two extremes.

President Tait has let it be known that it is his earnest desire that tegis lation intended to give stability to country's currency shall have attacked to it no taint of suspicion of what is generally called Wall street The president is telling his friends that he is confident, from what Senator Aldrich tells him, that the Rhode Islander to no less auxious than he to see to it that Wall street shall In no way be given an entering wedge

Gift for the Kalser.

The house of representatives has appropriating \$5,000 for a replied of the statue of the Baron von Stenben which is to be erected soon in Langvette square Washington. The replica of statue, if the sounte sanctions the house action and the president show the bill, will be sent to Kaiser Wilhelm and the German people in the name of the people of America as a grateful recognition of the services of you Steaben to the American colonies when they were trying to throw off the voke of Great Eritain.

The measurement to present the you Steuben memorial to Germany was in itiated by Representative Richard Bartholds of St. Louis. Mr. Partholds was born in Germany, but he has lived in this country a great many years It is perhaps possible that the Sr Louis representative had the German people in mind more than the Ger man emperor when he first thought of a pinn to present the von Steuben memorial to the fatherland. Once on a time, if the records are not wrong Mr. Bartholdt was in Berlin and de siring to pay his respects to the emperor, be requested an audience and described himself as a German-Amer ican. It is said that Emperor Ham remarked, "Germans 1 know and Americans I know, but German-Ameri cans I do not know This was emperor's way of intimating that a and that he did not like hyphenated nationalities.

Meant as Return Compliment.

The gift to Germany will be a sort for lack of a better name they call of return compliment for the gift a Laboratory of Criminology. The which Wilhelm made to the United subcommittee of the committee on ju- States eight years ago of the status diciary has just reported favorably a of Frederick the Great. It was with Frederick the Great's permission that money for the establishment of such Baron von Steuben or Gen. Steuben. a laboratory or bureau. It is not the as he came to be known in America. was allowed to come to this country large affair. What the chief to the Continental armies. Gerfriends of the measure want is to many, it is said, has always felt more have appointed three or four special or less keenly a regret that Ameri lsts in criminology who will make cans should have thought principally about Germany's attitude in the revolutionary war as one made manifest possible in some way to bring to bear by the dispatch of the Hessian birecause of the British.

The gift of the statue of Frederick the Great, with marked reference to the relation between Frederick and Gen. Steuben, was intended as an offset to the unpleasantness that is connected with the Hessian hirelings The statue of Frederick the Great stands in front of the American war college in the city of Washington When the gift was made, there was a great deal of adverse criticism in America. Congress was urged not to receive the gift because citizens whose criticism was of the extreme and per haps unthinking kind, declared that we wanted no statues of kings in this country. The gift, however, was received in the spirit in which it was offered.

The statue had not been long in an attempt was made to destroy for a small-sized bomb was exploded excitement.
